Who We Are

RedGrid.Cloud is an Istanbul-based software squad delivering production-ready platforms. We design, build, and operate cloud software for **Turkish SMEs**, **Gulf founders**, and **global NGOs**.

Combining product strategy, full-stack delivery, and managed cloud in **6-week sprints**, we help businesses ship faster without compromising quality.

Headquarters

Istanbul, Turkey — Bridging Europe, Middle East & Asia

Team Size

19+ Senior Engineers with specialized expertise

Global Reach

Serving clients across Türkiye, MENA, ASEAN & beyond

Trusted By

SERAY, eProfiler Solutions, idsMED, ScoreStars.io, NexGen Cloud

Our Services at a Glance

Three integrated service pillars designed to take you from concept to production—and keep you running at peak performance.

Full-Stack Development

End-to-end product engineering from discovery to deployment. UI/UX, backend, APIs, and DevOps in one integrated squad.

- ✓ 6-week delivery cycles
- ✓ React, Node.js, Go stack

Data & Cloud Solutions

Modern data foundations and cloud architecture. Scalable pipelines, secure infrastructure, and AI/ML integration.

- ✓ AWS, Azure, GCP, Sovereign
- ✓ Kafka, dbt, Kubernetes

Maintenance & Protection

Always-on stewardship combining SRE, security, and FinOps. Proactive monitoring, compliance, and disaster recovery.

- ✓ 24/7 monitoring & SRE
- ✓ ISO 27001, SOC 2 ready

Full-Stack Development

End-to-end product engineering that ships production-ready platforms in 6-week sprints

End-to-End Squads

UI/UX designers, backend engineers, QA specialists, and DevOps—all in one pod. 6-week delivery cycles with demo-ready increments.

Front-End Craftsmanship

Ship responsive React/Next.js and React Native apps with design systems, a11y, and performance budgets baked in.

Robust APIs & Data

GraphQL and REST services with Prisma/Drizzle, Kafka, and serverless workers so integrations remain stable.

DevOps & CI/CD

Terraform, GitHub Actions, Argo CD, and automated testing keep releases boring and recoveries fast.

Continuous Support

Roadmap, SRE, and growth experiments stay active post-launch so velocity never stalls.

Product Partnership

We co-own backlog triage, user research, and analytics so builders always know what matters next.

Data & Cloud Solutions

Modern data foundations and cloud architecture that scales with your business

Scalable Data Pipelines

Kafka, Debezium, and dbt transform event firehoses into curated models for BI and ML teams.

Secure Cloud Architecture

Zero-trust networking, secrets automation, and policy-as-code keep auditors happy without slowing down engineers.

Data Engineering & Analytics

Connect disparate sources, model with dbt/LookML, and surface metrics in Looker, Power BI, or Superset.

Cloud Infrastructure Management

Landing zones, backup strategies, and geo-fenced deployments built with Terraform and Crossplane.

AI & ML Integration

Serve feature stores, notebooks, and managed inference endpoints so data scientists can deploy safely.

DevOps & Automation

CI/CD, cost automation, and autoscaling tuned for mission-critical analytics workloads.

Maintenance & Protection

Always-on stewardship that extends the life of every release

Proactive Monitoring

Synthetic tests, log pipelines, and anomaly detection surface issues before customers notice.

- ✓ 24/7 observability
- ✓ Real-time alerting

Security & Compliance

Vulnerability scans, secrets rotation, and automated evidence collection keep audits painless.

- ✓ ISO 27001 ready
- ✓ SOC 2 alignment

System Maintenance

Patch management, capacity planning, and performance tuning aligned to SLAs.

- ✓ Regular patching
- ✓ Performance optimization

Data Protection & Backup

Immutable backups, cross-region replication, and recovery playbooks tested quarterly. Your data is always protected and recoverable.

Disaster Recovery & BC

Tabletop exercises and automated failover so the business keeps moving during incidents. Business continuity is not an afterthought.

Our Promise: RedGrid.Cloud becomes the extension of your ops team—keeping uptime high, costs optimized, and stakeholders informed.

OUR WORK

Portfolio Highlights

Where innovation meets IT excellence—selected projects that showcase our capabilities

eProfiler Solutions

Singapore

IoT Platform

Physics-grade characterization platform that lets lab teams and QA engineers stream sensor output directly into the cloud for instant benchmarking.

- ✓ Real-time data streaming
- ✓ Cloud integration

idsMED

ASEAN

Healthcare

Consolidated ASEAN medical supply operations into a single pane of glass with live inventory, partner SLAs, and field logistics telemetry.

- ✓ Supply chain optimization
- ✓ Real-time tracking

ScoreStars.io

Estonia

Mobile App

Launched a gamified basketball fan platform where users draft squads, earn boosters, and cash-out rewards straight from their phone.

- ✓ 11-week launch
- ✓ Crash-free deployment

NexGen Cloud

Multi-Region

Cloud Infra

Provisioned a multi-region GPU cloud for AI builders with reserved H100 pools, managed Kubernetes, and transparent usage billing.

- ✓ GPU cloud infrastructure
- ✓ White-glove SRE

Our Competitive Edge

What sets us apart in the competitive software development landscape

Senior Talent

100% senior and lead engineers. No juniors learning on your dime. Every team member has deep expertise in their domain.

★ 19+ engineers, all senior level

Speed to Market

4-6 week MVP delivery timeline. Our 6-week sprint methodology ensures you see progress fast and can iterate quickly.

🕒 40+ platforms shipped

Cost Advantage

Turkey-based talent delivers 40-60% cost savings compared to Western Europe while maintaining world-class quality standards.

📈 Top 15 global developer pool

Strategic Location

Istanbul bridges Europe, Middle East, and Asia. GMT+3 time zone enables seamless collaboration across continents.

🌐 1.5B consumers within 4hr flight

End-to-End Ownership

From product strategy to deployment to ongoing operations—we own the entire lifecycle so you can focus on your business.

⚙️ Strategy + Delivery + Ops

Cultural Fit

Work culture compatible with European and MENA business practices. Strong English proficiency ensures clear communication.

🗣️ High English proficiency

Why Turkey?

Turkey's thriving tech ecosystem offers unparalleled advantages for software development

Massive Talent Pool

700K+

IT Professionals

140K+

Software Developers

10,000 new developers added annually. Top 15 global ranking for software developer population.

Cost-Quality Ratio

40-60%

Cost savings vs Western Europe

Competitive labor market delivers significant savings while maintaining world-class quality standards.

Strategic Location

- ✓ GMT+3 time zone—overlap with EU, MENA & Asia
- ✓ 1.5 billion consumers within 4-hour flight radius
- ✓ EU Customs Union membership

Thriving Tech Ecosystem

90+

Technoparks

7.5K+

Tech Companies

\$4B+

Annual Exports

Home to unicorns like Getir, Dream Games, and Hepsiburada.
